Experience & Competencies

I'm not only a **web developer**, I also have experience in many other fields of life. During my semester breaks, I worked as a **taxi driver** and brought many people safely from A to B, helped out in a **pizzeria**, and many other things. All in all, I am a **flexible** person who can **work under pressure**, with good **communication skills**, and above all one thing - a **strong ambition**.
